

Forms Management Software

Feature-packed at an affordable price!

"FIX software has been the ideal solution for my company and my customers' warehouse/inventory management needs."

Information Availability

FIXProII enables users to determine stock levels and stock location. With a click of the mouse, you can see balances in each warehouse and each bin. The system also tracks all transactions entered into the system—such as what's on order, backordered, waiting to be priced, just shipped, MTD and History.

Improved Inventory Control

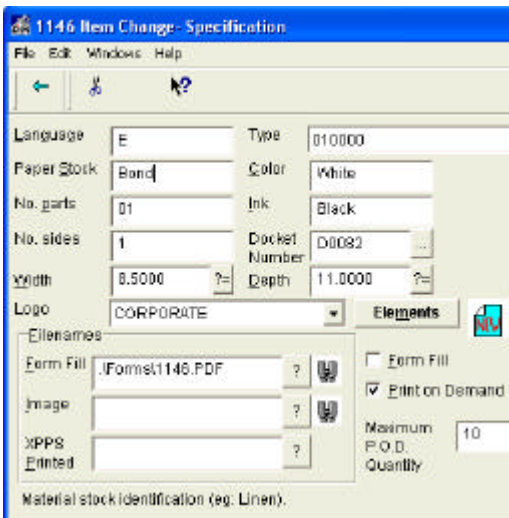

Managing an inventory of hundreds of different items is simple with **FIXProII**. No longer is it time-consuming, difficult, or inaccurate.

Detailed status reports are available to minimize warehouse costs:

- Low Stock levels based on minimums or usage.
 - by item
 - by warehouse
- Obsolete and slow-moving stock.

Guarantee

Ironwood stands behind the quantity of its products with a 90-day full refund policy. Your software investment is protected.

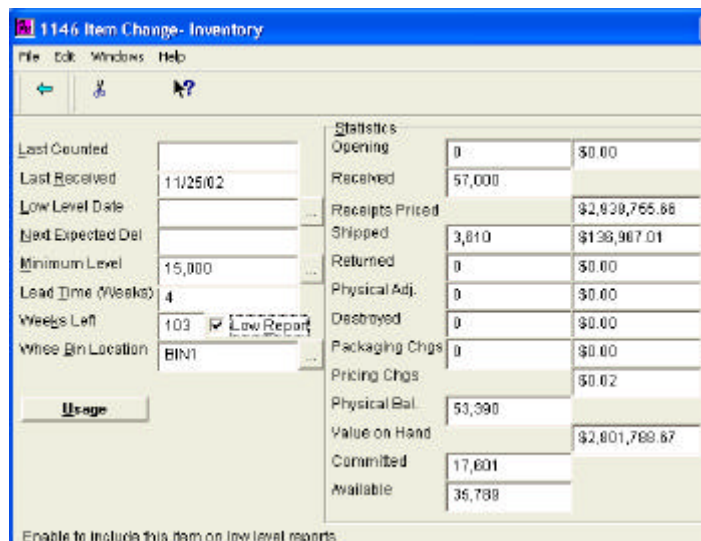

Integrated with Electronic Forms

Integrating production specifications with an electronic design package brings everything on one screen. View the actual form while reviewing the production specifications. **FIXProII** can integrate with any of the most popular technologies such as JetForm® and Docutech®.

Modification

Ironwood believes that each company operates differently. In order to meet the unique needs of our clients, we offer customization of the **FIXProII** system. Custom software is designed and implemented at an affordable price.

Forms Management Software

"We have been using FIX forms management software for over 4 years—it's passed every test!"

Sara Fieberg, BFMA member from North American Company for Life Health Insurance.

FIXProII is one of the most flexible, technologically advanced and user-friendly inventory systems available today. It uses industry-leading requisitioning that includes the distribution of stocked supplies and electronic forms. **FIXProII** provides great savings and productivity improvements. **It's the best way to manage your inventory functions!**
